

The Premier Trust Single Investment SIPP

Consumer Duty: Product Specification and Target Market

Introduction

The FCA's rules on Consumer Duty set out standards for products and services that we provide and require us to act to deliver good outcomes for retail customers. We are fully committed to the rules and allocated significant resources to ensure that we meet the various deadlines and continue to do so to ensure we deliver good outcomes for our customers.

This document sets out important information about the Premier Trust SI SIPP, who it is suitable for, and gives an overview of the work we are doing to ensure we continue to comply with the regulations.

Product Summary

Our Premier Trust Single Investment SIPP is a "member directed" personal pension plan. It offers clients (with the assistance of their financial adviser if they have one) control over what they pay in, how they invest their fund, and how they draw benefits out. It is a "single investment" SIPP that permits clients to hold one investment manager account which they can use to invest in a wide range of standard investments.

The SIPP is provided on a fee basis and as such offers complete transparency on charges, with a menu approach for additional services.

This section gives a brief overview of the product. Full details can be found in the Key Features, Terms of Business, Fee Schedule and other supporting literature.

Distribution

The SIPP is distributed through two channels:

- On an advised basis through FCA regulated financial advisers holding the appropriate permissions.
- On an execution only basis with non-advised clients opening a SIPP directly with us. We do not provide financial advice to these clients.

We do not accept business from non-regulated introducers.

Transfers in

Clients can transfer benefits held in other registered pension schemes into their SIPP. However, the SIPP does not accept transfers from:

- Defined Benefit schemes,

- Qualifying Recognised Overseas Pension Schemes (QROPS), or
- schemes that contain Guaranteed Minimum Pensions (GMP's).

We will only accept transfers from schemes with Guaranteed Annuity Rates (GAR's) if a positive recommendation to transfer has been provided by an FCA regulated financial adviser. The SIPP can accept in specie transfers (in the form of assets rather than just cash).

Contributions

The SIPP can accept employer, employee and third-party contributions. The contributions can be one off, regular and ad hoc. The SIPP cannot accept in specie contributions.

Investments

The SIPP can open one investment manager account, which could be with a:

- Discretionary Fund Manager,
- Platform,
- Stockbroker, or
- Insurance Company.

The chosen account can be used to invest in standard investments. The SIPP cannot hold commercial property, nor can it hold any other investments in addition to the investment manager account. If a client would like access to such investments, then they can do this through our Premier Trust Full SIPP.

The SIPP is not permitted to invest in non-standard assets (such as unregulated investments, hotel developments, or unlisted shares).

Member benefits

Clients have access to a wide range of benefit options and can draw lump sums and income directly from their SIPP through drawdown. They can also take their benefits in stages through phased drawdown.

Transfers out

Clients can transfer out of our SIPP at any time and for any reason. We do not place any unnecessary barriers (either administrative or financial) on their ability to transfer. Alternatively, they can switch to another of our SIPP products if they would like.

Product Objectives

The main objectives of the product are as follows:

- To enable retail clients to save for retirement (accumulation) within a registered pension scheme.
- To give clients a wide range of investment options within a single investment manager account.
- To enable clients to take retirement benefits (decumulation) from their SIPP by drawing a lump sum and/or an income from their fund.
- To give clients the flexibility to take their benefits in stages.
- To give a high-quality service to clients, which delivers positive outcomes and is cost effective.

Target Market

The Premier Trust Single Investment SIPP has the following target market:

- UK resident retail clients who are either:
 - advised by a regulated financial adviser, or
 - non-advised, acting on an execution-only basis.
- A retail client who is engaged with their pension and who (with or without the help of a financial adviser) wishes to take control over their investment choices.
- A retail client looking to invest in securities through an investment account held with a discretionary fund manager, platform or stockbroker.
- A retail client looking to take advantage of the range of benefit options available.
- A retail client looking for a high-quality service.
- A retail client with reasonably sized pension savings – as the fixed rate fees become disproportionately high for lower fund values. We have set the threshold fund value at the point at which the estimated annual fee for the product (inclusive of VAT) exceeds 1.25% of the value of the SIPP. Where the value of a SIPP is below this level then we investigate further to determine whether the SIPP is appropriate. The current threshold values are set out below:

SIPP Category	Estimated Annual Fees including VAT	Threshold SIPP Value
Accumulation SIPP	£281.25	£22,500
Drawdown SIPP	£438	£35,040

Vulnerable Customers

The FCA has described a vulnerable customer as “someone who, due to their personal circumstances, is especially susceptible to harm, particularly when a firm is not acting with appropriate levels of care.”

Vulnerability could occur as a result of a wide range of factors, such as physical or mental ill health, financial difficulty, significant life changes (like divorce or bereavement), or simply a difficulty in dealing with financial information.

Vulnerability can be temporary, intermittent, or permanent.

We are fully committed to delivering good outcomes to clients with characteristics of vulnerability by tailoring our service and support to meet their individual circumstances.

Price and Value

We charge fees using a menu-based approach with fixed fees for performing specific functions.

We have completed a comprehensive fair value assessment of our fees to ensure that the product represents good value for money for the target market identified above.

This analysis included:

- **Cost analysis** – To ensure that the fees charged are reasonable based on the cost of performing the task to which they relate.
- **Competitor analysis** – We compare our charges to other SIPP operators who offer similar products
- **Client and Adviser feedback** – We review and act on feedback relating to our fees. We proactively seek feedback from clients and advisers in the form of satisfaction surveys.

The fair value assessment is completed at least annually.

Consumer Understanding

We are committed to ensuring that our communications meet the needs of our customers, can be easily understood, and enable clients to make informed decisions. In doing so, we focus on the following key areas:

- Use of clear language
- Focus on the target audience
- The method of communication (letter, email, phone) to ensure it works for the client in question
- A clear and easy to follow layout
- Lack of small print
- Lack of jargon (or where unavoidable, we ensure that we explain what it means)
- The right amount of information for the circumstances.

We test and monitor our effectiveness by:

- Having our communications reviewed by 'laypeople', and
- Gathering and reviewing clients' actions and feedback.

Consumer Support

We ensure that we deliver an appropriate service that responds flexibly to the needs of our clients. We achieve this through (among other things):

- Setting up our systems and processes in a way that supports our clients and enables them to disclose their needs.
- Informing clients of the support available to them.
- Putting in place adequate resources, systems and processes to ensure we deliver good service to our clients.
- Ensuring our staff are proactive and focused on the needs of our clients.

We test and monitor our effectiveness by gathering and analysing management information to ensure the product is performing as expected. This includes feedback gathered from clients and advisers.
